

Come sit with us

You'll do more than just sit! By joining us for this interactive half-day training, you will learn how you can help end childhood lead poisoning using effective strategies and tools to get the lead out of our kids.

In less than four hours you will learn the most current and locally applicable information on childhood lead poisoning prevention and intervention

- Understand how you can make a direct impact by educating parents and other caregivers on Childhood Lead Poisoning.
- Understand the urgency and seriousness of Childhood Lead Poisoning: its local prevalence, and the long term impact on children.
- Learn about screening and testing procedures as well as the wealth of resources in Kent County.
- Learn how to advise and help caregivers to protect their children and *get the lead out* of our community!

Participants seeking the 3.24 contact hours offered through the Michigan Nurses Association must successfully complete a post-training assessment.

 **Get the Lead Out!**

"Our community has shown that by working together and raising awareness, children can be protected. Caring and informed providers are the key to solving this 100% preventable problem."

Rev. George Heartwell
Mayor of Grand Rapids

"Parents need the tools and knowledge to protect their children. As providers, we can and must provide those resources."

Dr. Jeri Weyher
DeVos Children's Hospital

"The support I received from Get the Lead Out! partners made all the difference in protecting my grandchildren. They taught me what to do, how to do it, and where I could get support!"

Adrianna Jones
Grandparent of (formerly) lead
poisoned children

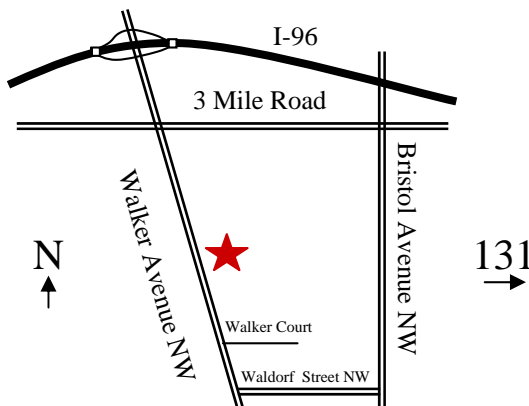

"As professionals who work with families and children, it's our responsibility to make sure that families are equipped to protect their children."

Mary Alice Williams
Arbor Circle
